

Stroke survivors' user requirements for monitoring and self-management services: a preliminary evaluation

Jordi Rovira Simón
eHealth R&D Manager at Telefónica

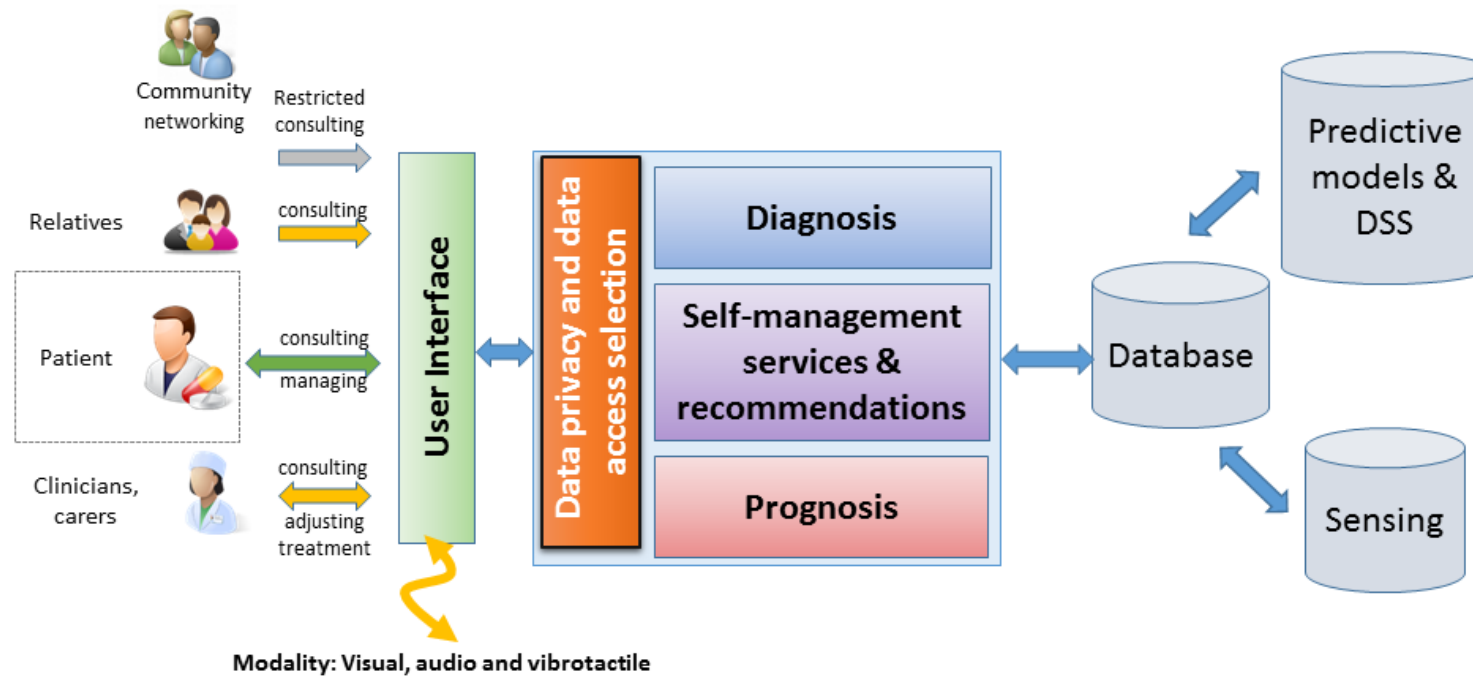

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No 689947.

The STARR project

- Primary objective:
 - ▶ Develop a modular, affordable, easy-to-use, install and maintain system which will inform stroke survivors about the relation between their daily activities and the risk of having a secondary stroke

Concept
